

# CARBON REDUCTION PLAN

COMMITMENT TO ACHIEVING NET ZERO BY 2045.

Distinctive Medical Products Ltd  
Publication date 1/10/2024

This Carbon Reduction Commitment and Plan is available on our website.  
[www.distinctivemedical.com](http://www.distinctivemedical.com) 

# Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions serve as the reference point against which emissions reduction can be measured. However, since this is our first year of calculation, our baseline and current year emissions are identical.

# Baseline Emissions Footprint

Baseline Year: 2023/2024

EMISSIONS	TOTAL (tCO <sub>2</sub> e)	
Scope 1	4	
Scope 2	Location Base: 3	Market Base: 5
Scope 3 (Included Sources)	874	
	Purchased goods and services	715
	Fuel- and energy-related activities	3
	Upstream transportation	143
	Waste generated in operations	1
	Business travel	-
	Employee commuting	7
	Downstream transportation	2
	End-of-life treatment of sold products	2
<b>Total Emissions</b>	883 Market Base 881 Location Base	

# Current Emissions Reporting

Current Year: 2023/2024

Baseline year emissions: 2023/2024

# Emissions Reduction Targets

To achieve Net Zero, and in line with the Science Based Targets initiative SBTi, we have adopted the following carbon reduction targets:

We are committing to reduce our Scope 1& 2 emissions by at least 45% by 2030 and 90% by 2040.

We are committing to reduce our Scope 3 emissions by at least 30% by 2030 and 90% by 2045.

# Carbon Reduction Projects

We are committed to monitoring our carbon emissions and conducting annual carbon footprint calculations covering all three scopes.

This commitment will be effective throughout the duration of the contract.

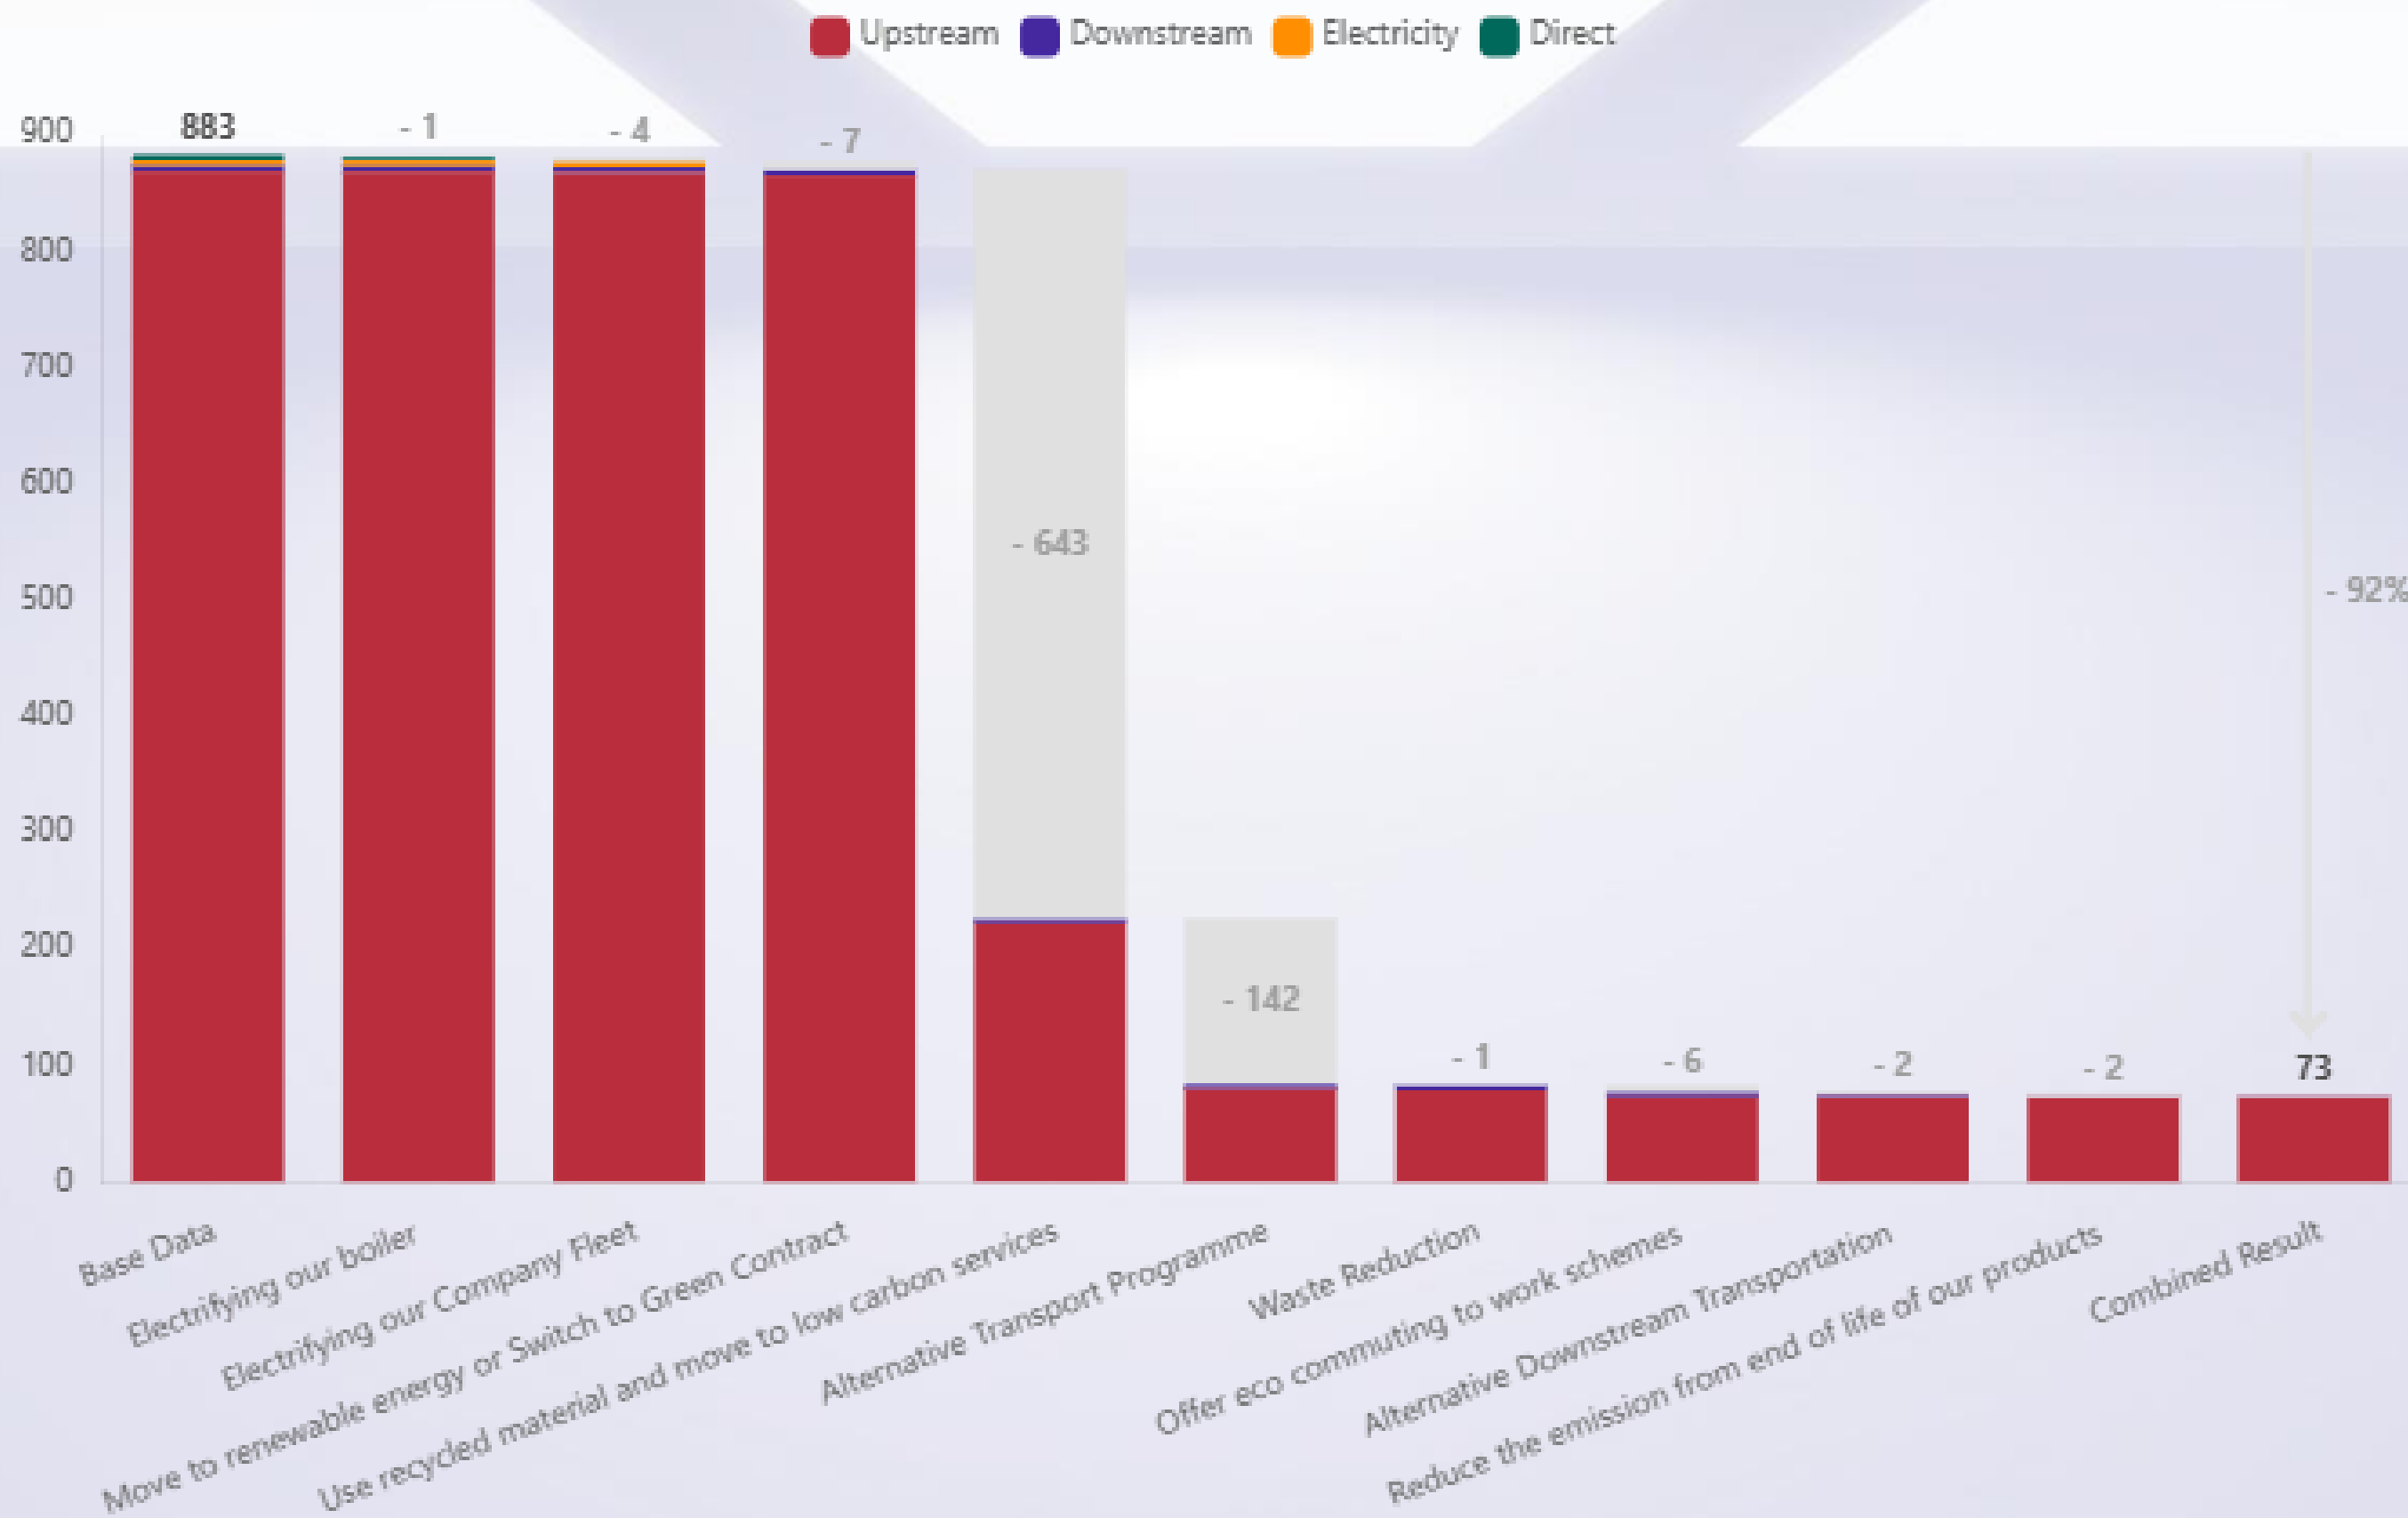

1. Electrify our boilers by 2032.
2. Electrify our company fleet by 2032.
3. Move to renewable energy or switch to a green contract by 2040.
4. Use recycled materials and transition to low-carbon services to achieve at least a 5% annual reduction in emissions in this category.
5. Implement an alternative transport program to reduce air freight emissions by 5% annually.
6. Reduce our waste emissions by 5% annually.
7. Offer eco-commuting options, such as EV salary sacrifice schemes and cycle-to-work programs.
8. Adopt alternative downstream transportation methods to reduce emissions by 5% annually.
9. Reduce emissions from the end-of-life phase of our products by working with our clients to improve the recyclability of materials, aiming to achieve a 5% reduction in end-of-life emissions.

These steps will collectively help us reduce our emissions by 92%.

This is to show the impact each of the measures will have on our emissions:

# Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[1] and uses the appropriate [Government emission conversion factors for greenhouse gas company reporting](#)[2].

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard[1].

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
